+91 7697265591 | pankajnamdev2004@gmail.com | www.linkedin.com/in/pankajj48 | https://github.com/pankajj48

## Professional Summary

Proficient Web Developer with hands-on experience in React.js, component-based architecture, DOM manipulation, and state management. Skilled in building responsive, accessible interfaces and integrating RESTful APIs. Strong understanding of modern JavaScript frameworks, version control, and web performance best practices.

## Education

### Bachelor of Technology - Computer and Engineering

Institute of engineering and science IPS Academy, Indore

2022-2026 | CGPA: 8.44 / 10

### Higher Secondary Education – Class XII (Science)

Govt. ModalH.S School, Kailaras, Morena

2020 – 2021 | 86.8%

## Experience

### Front-End Developer Intern

AlphawizzTechnology | May 2025 – June 2025

Mode: Work From Office – Indore, MP

- Developed and deployed two React-based projects, improving page load performance by 30% and reducing UI bug reports by 40%
- Enhanced code reusability by 50% through adoption of component-based architecture, leading to faster development cycles across modules.
- Delivered UI with 98% design accuracy, boosting user satisfaction and reducing page load time by 25% through optimized image rendering and re-render control

### Website Design and Development Intern

Internship Studio | May2024–June2024

Mode: Remote (Work from Home).

- Built a fully responsive e-commerce website, increasing mobile conversion rate by 35%
- Streamlined manufacturing processes, reducing production costs by 10%.
- Optimized frontend workflows, reducing load time by 30% and improving user engagement.

### Front-End Developer Intern

Pratinik Infotech | May 2024 – June 2024

Mode: Remote (Work from Home).

- Designed and delivered a lightweight personal finance tracker using HTML, CSS, and JavaScript.
- Implemented real-time calculations for income, expenses, and budget balance with category-wise tracking.
- Utilized local Storage to persist user data across sessions without server-side dependencies.

## Projects

#### YouTube Clone | (React.js, YouTube API) | [Live Preview](#)

- Developed a video streaming platform with real-time search, achieving 99% uptime and 40% faster page transitions using dynamic routing.
- Integrated YouTube Data API and implemented client-side routing using React Router.
- Crafted a mobile-first UI with dynamic category filters and time formatting.

#### Plumbing Service App | (React.js, CSS, React Router) | [Live Preview](#).

- Developed a multiservice plumbing web with page routing, service filters, and a booking form.
- Applied component-based architecture for better scalability and maintainability.
- Deployed live using GitHub Pages with responsive layout optimized for mobile users.

#### Bhanukart | HTML, CSS, JavaScript, Bootstrap | [Live Preview](#)

- Created a complete e-commerce platform with product catalog, shopping cart, and checkout functionality.
- Optimized layout and interactive elements for a seamless shopping experience across devices.
- Implemented responsive design using Bootstrap grid system and media queries.

#### Expense Tracker | HTML, CSS, JavaScript | [Live Preview](#).

- Executed real-time income/expense calculation logic.
- Utilized local Storage for persistent data saving without backend
- Ensured cross-device compatibility with responsive design.

## Technical skills

Languages:	JavaScript (ES6+), Python, C++, SQL
Frontend:	React.js, Redux, Bootstrap, Responsive Design, HTML, CSS
Backend:	Node.js, Express.js, Django, REST APIs
Database:	MongoDB, MySQL, SQLite
Tools & Platforms:	Git, GitHub, VS Code, Postman, Netlify
CS Fundamentals:	Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Operating Systems

## Achievements

- Earned the "AWS Academy Graduate – Machine Learning Foundations" certification from AWS Academy (June 2025).
- Selected for Smart India Hackathon 2023 & 2024 (college-level round).
- Runner-up at the Intercollege Science Exhibition, presenting an automation/robotics solution.
